Dear Neighbour,

This is to keep you informed of our planned delivery on Sat, 8 Jun 19, which is as follows:

1. **Type of Delivery:** 20 Tonne Excavator.
2. **Delivery Vehicle:** 6 Axle Low Loader.
3. **Time:** 07:00 – 07:50 hrs.
4. **Route In:** Winchester Road, Eaton Avenue to Site.
5. **Route Out:** Site, Eaton Avenue, Winchester Road existing to A41.
6. **Traffic Management:** Owing to the length of delivery vehicle, it is required to reverse into the site (please see below route), which will be managed by 6 or more traffic marshals. The route via Market Place shall be excluded using crowd barriers. Once the excavator is off loaded within site, the delivery vehicle will leave site in forward gear.

- Purpose of Additional Excavator:** To speed up structural demolition of southern section of the building, that would enable new access route off A41 to be created. This will reduce traffic movement through Winchester Rd. Additionally will also bring a crusher at the end of **June** to site that will facilitate us to keep most of the hardcore on site and re-utilise if new pile mat, The crusher will reduce the amount of lorries required to dispose hardcore of site during demolition phase starting as of week commencing **3rd of June 2019**

Yours Sincerely

Gabriel Stetco (Project Manager)
